

## Teacher notes

# 100 Commonly Misspelt Words Retrieval Toolkit

The templates here provide children with a number of ways they can quickly refer to a list of 100 commonly misspelt words, supporting them in learning the correct spellings.

### Bookmarks

Each of these bookmark displays a list of commonly misspelt words.

Tickboxes are included, enabling children or an adult to tick a spelling off when it is known; when all the boxes have been ticked, children can stick the bookmark into their book, and start another.

### Table prompts

These table prompts list the same commonly misspelt words as the bookmarks. They can be folded in half, enabling them to be propped up in front of individual children, so they can easily refer to them when writing.

They can also be used in the centre of tables when working in groups.

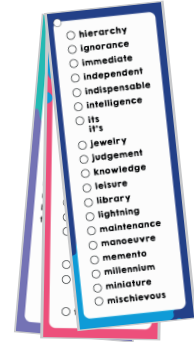

Tickboxes are included, enabling children or an adult to tick a spelling off when it is known.

## Word list fan

Here, the commonly misspelt words are presented on individual 'fan blades', which can be joined together using a split pin, enabling pupils to shuffle through the full set.

Tickboxes are included, enabling children or an adult to tick a spelling off when it is known.

## Word list mats

These two mats display the full list of 100 commonly misspelt words in a very simple and accessible format. They can be printed out for specific children; sent home to be studied with parents/carers; or left on tables while children are writing. As before, tickboxes are included, enabling children or an adult to tick a spelling off when it is known.
