

Task 1

Complete the table below, finding examples of animals for each animal group.

Animal Group	Examples of animals
invertebrates	
vertebrates - mammals	
vertebrates - birds	
vertebrates - fish	
vertebrates - reptiles	
vertebrates - amphibians	

Task 2 - Habitats

Use the cards on the next page and match each animal and plant to the habitat that it lives. Place them correctly in the table below.

Habitat	Plants and animals that live there
desert	
rainforest	
coral reef	
savannah (grassland)	
tundra/polar	

<p>camel</p> 	<p>snowy owl</p> 	<p>clown fish</p> 
<p>cocoa tree</p> 	<p>arctic hare</p> 	<p>scorpion</p> 
<p>meerkat</p> 	<p>polar bear</p> 	<p>star fish</p> 
<p>giraffe</p> 	<p>arctic poppy</p> 	<p>sea urchin</p> 
<p>antelope</p> 	<p>blue morpho butterfly</p> 	<p>cactus</p> 
<p>scarlet macaw</p> 	<p>jaguar</p> 	<p>sea grass</p> 
<p>lion</p> 	<p>baobob tree</p> 	

Extra Challenges:

- Can you find more examples of animals and plants that live in each habitat?
- Choose one of the animals and describe how it has adapted to its habitat.
