

The famous Greek mathematician Archimedes is credited with creating the *Stomachion* puzzle. The puzzle is made up of 14 pieces created by dividing up a square. The aim of the puzzle is to arrange the pieces to create different shapes.

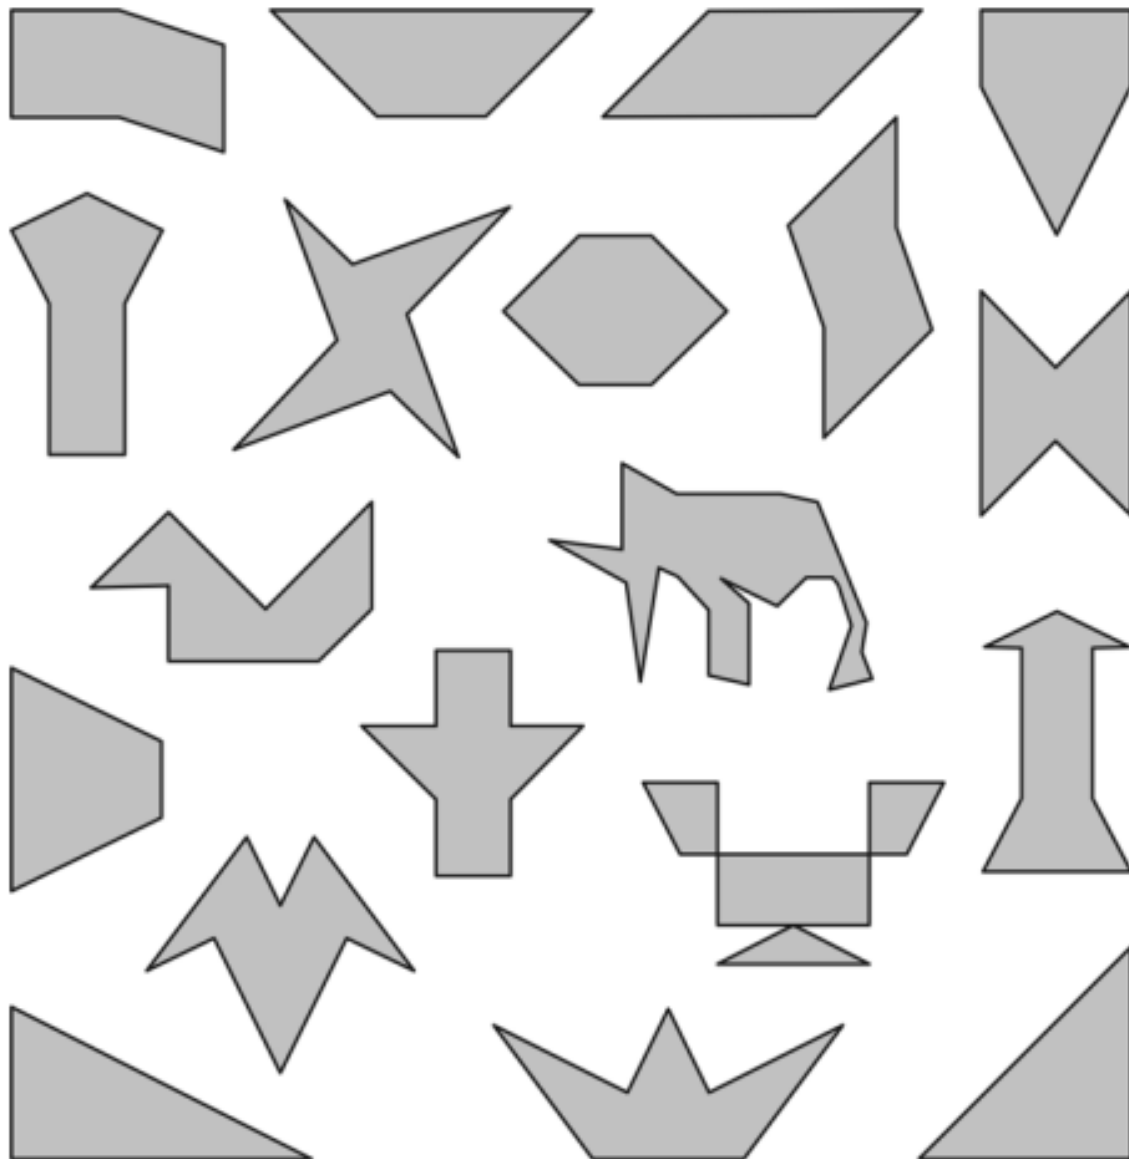

Cut out the puzzle below and then try to create the examples shown.

Begin by trying to arrange them as a triangle.

Now try to create these trickier puzzle shapes.

Have a go at creating some of your own Stomachion shapes.
