

1. Choose a food chain for your mobile and identify: the energy source; the producer; the consumer; the predator.
2. Next, draw each part of the food chain twice so that it can be double-sided.
3. Label each part correctly.
4. Finally, thread it together in the right order on a piece of string adding arrows to show the direction.

Example:

Also, add these labels:

- Energy source
- Producer
- Consumer
- Carnivore
- Herbivore
- Predator
- Prey
- Top carnivore, *and the names of the animals and plants.*

Draw and colour on both sides.

string

Extension ideas:

You could make a food chain related to someone else's in your group and then link it to make a food web.

You might want to make a dinosaur food chain.
