

20.1.23. sea turtles

A sea turtle is called a reptile. There are different species in the world.

What do they look like?

Sea turtles have a giant shell. Their shell is made of bones. The pattern is called a scute. A sea turtle's beak is so tiny you can't see it.

Prey and predator??

A prey to a sea turtle is a jelly fish, sword fish, clown fish, squid and many more.

but the bad thing is a sea turtle has a predator...

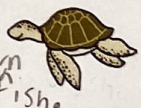

A sea turtle's predator is sharks, whales, seals and dogs. You might be wondering how are dogs predators. They are predators to baby sea turtles.

fascinating food.

Sea turtles eat coral, seaweed, sea grass. They are all sea plants. They eat animals too like for example squid and clown fish.
