

20 1 23 Sea turtles

What do sea turtles look like?
 Sea turtles have a hard, patterned shell and they are cold blooded so they stay in the warm sea they have a green, blue or brown shell. Many sea turtles have spiky skin.

Where do sea turtles live?
 Sea turtles are cold blooded animals so they stay in the warm fresh sea. But they lay their eggs on land they live in Antarctica, Australia and the end of the world - even, they nily lay 100s of eggs.

What do sea turtles eat?
 Sea turtles eat seaweed, jelly fish, sea grass and scud like shrimp, pinky or Red. Also they have flippers because when they don't have flippers can't swim but when they do have flippers they can swim.

I LOVE sea turtles because they are so super cute! I LOVE sea turtles they are so beautiful.
