## Sea turtles

What do they look like?

Sea turtles have a green boney shell that protect them. They have razor shap jaws that chop their food. They also have a patten on their body and shell. They are cold blooded so they sneekly sneak to the warm sea.

What do they eat?

Sea turtles eat thing in the crystall clear sea like jellyfish, sea wee and sea grass because they need good and drink to survive. Did you

Where do they lay their eggs?

They go to land to lay their small eggs on the beach. They berry their egg in the hot sand because they need to be safe.

At night the baby sea turtles climb out but it not safe because dog and seagulls can sneak up grab all of them then go fly around for hours.

dogs can pick them up in their mouth.

Did you know when you dig the hole its a rula deep and sea turtles can eat jellyfish with out getvn

stung
